General Information

This manual has been written to be used by shop technicians in charge.

The operating instructions are considered to be an integral part of the product and must remain with it for its whole useful life.

Read every section of this manual carefully before making any installation or operation.

The company is not liable for possible problems, damage, accidents, etc. resulting from failure to follow the instructions contained in this manual.

Only skilled technicians of AUTHORISED DEALERS or SERVICE CENTRES AUTHORISED by the manufacturer shall be allowed to carry out lifting, transport, assembling, installation, adjustment, calibration, settings, extraordinary maintenance, repairs, overhauling and dismantling of the product.

The manufacturer is not responsible for possible damage to people, vehicles or objects if said operations are carried out by unauthorized personnel or the product is improperly used.

Any use of the product made by operators who are not familiar with the instructions and procedures contained herein shall be forbidden.

For a proper use of this manual, the following is recommended:

- keep the manual near the product, in an easily accessible place.
- keep the manual in an area protected from the damp.
- use this manual properly without damaging it.
- Any use of the product made by operators who are not familiar with the instructions and procedures contained herein shall be forbidden.

This manual is an integral part of the product: it shall be given to the new owner if and when the product is resold.

Operators must not be under the influence of sedatives, drugs or alcohol when operating the product.

Declaration Of Warranty And Limitation Of Liability

The manufacturer has paid proper attention to the preparation of this manual. However, nothing contained herein modifies or alters, in any way, the terms and conditions of manufacturer agreement by which this product was acquired, nor increase, in any way, manufacturer's liability to the customer.

To The Reader

Every effort has been made to ensure that the information contained in this manual is correct, complete and up-to date. The manufacturer is not liable for any mistakes made when drawing up this manual and reserves the right to make any changes due the development of the product, at any time.

Description

2.1 Description

This alignment kit is used to be bolted on a proper 4 post lift for alignment purpose.

Fig. 1

2.2 Specifications

LIFT CAPACITY	14,000lbs (6400kg)
Overall Length	199 1/3" (5062mm)
Overall Width	20 5/8" (524mm)
Min. Wheel Base	75 2/5" (1915mm)
Max. Wheel Base	148 2/3" (3776mm)
Min. Turntable Recess	1 1/2" (40mm)
Max. Turntable Recess	2" (50mm)
Weight of Alignment Kit Only	1015 lbs (460kg)
Weight of Turntable Only	55 lbs (25kg)

Fig. 2

Installation

3.1 Front Spacer Installation

- Remove the screws bolted to the front wheel stop and the runway to the cross beam;
- Place the front spacer on the runway so that two thread pins under the spacer are aligned with the holes on the runway;
- Attach two nuts M10, washers D.10 and locking washers D.10 to the pins as shown. Tighten the nuts;
- Place the wheel stop on the front end of the spacer so that two holes are aligned with the holes on the wheel stop;
- Attach two screws M12X30, nuts M12, washers D.12 and locking washers D.12 as shown. Tighten the screws.

Fig. 3

3.2 Recess Plate 1 Installation

The recess plates are needed to be installed when the 1-1/2" high turntables are used on the lift.

The movable spacer (ref. fig.6) can be put on either recess 1 or recess 2 according to the different wheelbase of the vehicle to be lifted.

- Place the recess plate 1 on the runway so that two holes on the end are aligned with the holes on the end of the front spacer;
- Attach two screws M10X20 as shown.
- Tighten the screws.

Fig. 4

3.3 Middle Spacer Installation

- Place the middle spacer on the runway so that two thread pins under the spacer are aligned with the holes on the runway, and two holes on the end are aligned with the holes on the end of the recess plate 1;
- Attach two nuts M10, washers D.10 and locking washers D.10 to the pins as shown;
- Attach two screws M10X20 as shown;
- Tighten the screws and nuts.

Fig. 5

3.4 Recess Plate 2 Installation

- If needed, place the recess plate 2 on the runway so that two holes on the end are aligned with the holes on the end of the middle spacer;
- Attach two screws M10X20 as shown. Tighten the screws.

Fig. 6

3.5 Long Spacer Installation

- Place the long spacer on the runway so that four thread pins under the spacer are aligned with the holes on the runway, and two holes on the end are aligned with the holes on the end of the recess plate 2;
- Attach four nuts M10, washers D.10 and locking washers D.10 to the pins as shown;
- Attach two screws M10X20 as shown;
- Tighten the screws and nuts.

Fig. 7

3.6 Rear Slip Plate Installation

- Place the rear slip plate on the runway so that two thread pins under the plate are aligned with the holes on the runway;
- Attach two nuts M12, washers D.12 and locking washers D.12 to the pins as shown;
- Tighten the nuts.

Fig. 8

3.7 Ramp Spacer Installation

- Place the ramp spacer on the runway so that two holes on the end are aligned with the holes on the end of the rear slip plate;
- Attach two hex socket screws M10X20 as shown.
- Tighten the screws.
